This webpage gave a good example on mapping. The controls positioned in a way that the behavior correspond to the layout and behavior of the device. They also avoid single controls for multiple functions. It's pretty straightforward and to the point with minimal confusion.
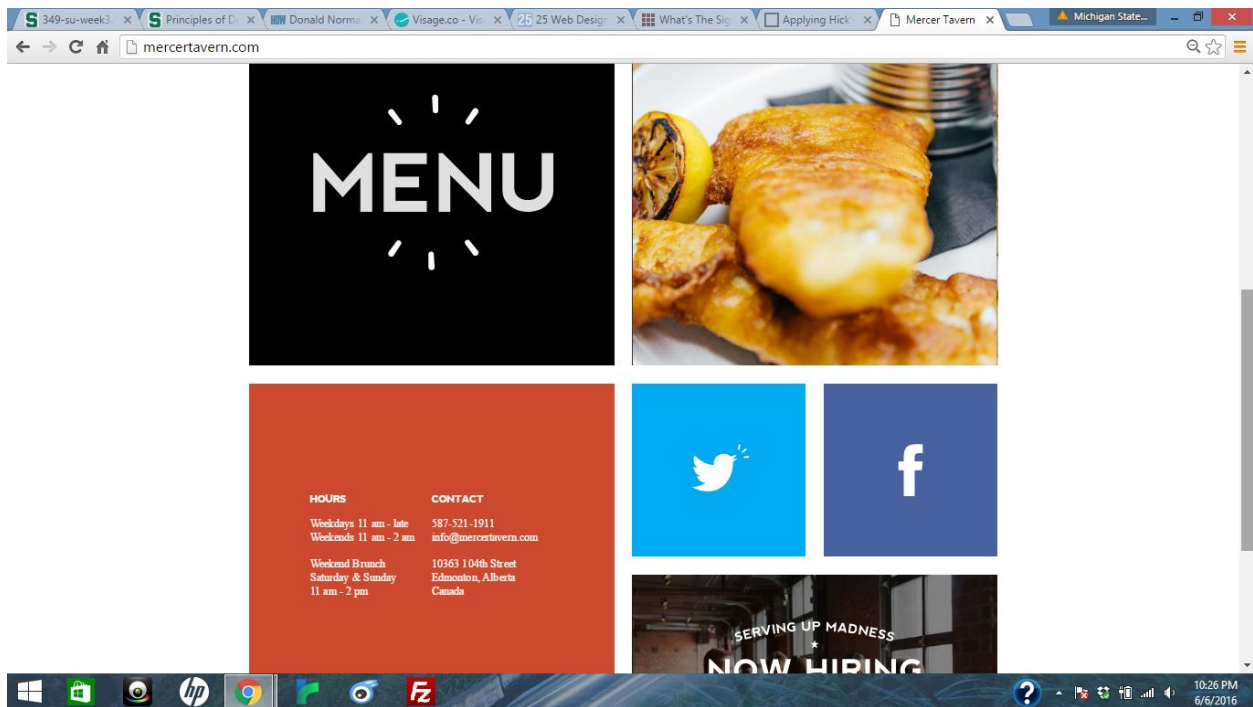

This is a great example of chunking. As you can see it is a combination of information into a limited amount of chunks for easier processing. It gives you enough information to know what the story is about it and not too much to overwhelm you.

This website was a good example of signal-to-noise ratio. The design was simple and didn't have to think much about it. It's not busy and it's easy on the eyes and give the reader something to focus on.

This website was an example of Hick's Law. It reduces the number of decisions involved. It gives simplicity and curiosity to the viewers.

This website is an example modularity. The design layout of the page is all in block form. It is easier to design and less prone to error.
